Re: Patent Number 10/709,331

I have received a package that patent was unsuccessful. It been quite a while along, since I had send back a reply and I haven't receives any feedback. I'm just wondering how the patent progressing.

I'm sending this fax to know it's currently status. Has it been processing, hold or fail again? I am really concern about this patent. If it did fail, what should I do? Is there any add-on that allows making on the patent? Or do I have to redo the whole patent application all over?

Please I have the right to know, please email me about the situation at Mnet321@yahoo.com.
